Process Definition Document (PDD)

Date	**25th Aug 2025**
Project	**SalesSynapse Pro - AI-Powered Sales Intelligence Platform**
Prepared By	Harpinder Singh
Stakeholders	Harpinder Singh, Ms. Supriya Jain, Ms. Vandana Seth, Sales Team Members

---

1. Purpose & Outcome

Deliver a modern, AI-enhanced sales visit tracking platform that automates visit reporting, provides strategic insights, and enables data-driven decision making. Target outcome: streamline sales documentation, provide AI-powered actionable insights, reduce administrative overhead by 70%, and improve sales team productivity through intelligent automation and real-time analytics.

---

2. Scope & Assumptions

EMBRACE AUTOMATION RV SOLUTIONS

In Scope

- Sales visit tracking with structured data capture (company details, discussions, outcomes)
- AI-powered insights generation using OpenAI GPT-4o Mini
- Manager dashboard with team performance analytics
- Expense tracking and reporting
- Export functionality to Excel
- Progressive Web App (PWA) installation support
- Role-based access (Salesperson / Manager)

Out of Scope

- Direct CRM integration (Zoho, Salesforce, etc.)
- Real-time chat/messaging between team members
- Mobile app development (available as PWA)
- Advanced reporting beyond current analytics
- Email automation for follow-ups

Assumptions

- Sales team has regular internet access for data synchronization
- Managers require consolidated team performance views
- AI insights add value but require human validation
- Mobile device usage is common among field sales team

---

3. Inputs & Required Format

Data Collection Points:

1. **Visit Details**: Company Name, Visit Date, Lead Name, Meeting Objective, Outcome
2. **Sales Data**: Sales Type (Contec/Non-Contec/Solutions), Sales Stage (0-7)

3. **Financials**: Estimated Budget, Expense Breakdown (Travel, Food, Accommodation, Miscellaneous)
4. **Contacts**: Contact Persons with Designation, Mobile, Email
5. **Action Items**: Task-based follow-ups with priority and timeline
6. **Discussion Notes**: Free-text documentation

---

4. Process Flow

4.1 AS-IS

1. Sales team conducts client visits in person
2. Manually record notes in notebooks or basic documents
3. Create visit reports in Word/Excel format
4. Email reports to manager for review
5. Manager consolidates data manually in spreadsheets
6. Action items tracked informally via email/chat
7. Expense claims submitted separately
8. Performance analysis done monthly via manual compilation

4.2 TO-BE (Automated Process)

1. Sales team opens app → Logs in with credentials
2. Clicks "New Visit" → Fills structured form with guided sections
3. App captures all visit details in standardized format
4. AI generates immediate insights and action items
5. Visit automatically saved to cloud database
6. Manager sees real-time dashboard with team activities
7. AI provides strategic recommendations for each visit
8. Reports generated instantly with one-click Excel export
9. PWA enables offline access and home screen installation

EMBRACE AUTOMATION RV SOLUTIONS

---

5. AI Integration & Insights

AI Capabilities:

1. **Visit Analysis**: Summarizes key takeaways from discussions
2. **Action Item Generation**: Creates specific, prioritized follow-up tasks
3. **Strategic Recommendations**: Provides next steps based on sales stage
4. **Risk Identification**: Flags potential issues in deals
5. **Manager Insights**: Offers coaching suggestions and performance insights

Processing Rules:

- AI analyzes visit data after submission
- Provides insights in structured format (key takeaways, next steps, risks, opportunities)
- Action items categorized by priority (High/Medium/Low) and type
- All AI suggestions can be reviewed and edited by users

---

6. Outputs & Analytics

For Salespersons:

1. **Personal Dashboard**: Visit statistics, pending actions, expense summary
2. **Visit Reports**: Detailed view of all visits with filtering/search
3. **AI Insights**: Strategic guidance for each visit

4. **Action Items**: Trackable follow-ups with completion status
5. **Export**: Excel reports with all visit data

For Managers:

1. **Team Dashboard**: Overall performance metrics, team statistics
2. **Stage Analysis**: Sales pipeline status across stages
3. **Performance Tracking**: Top performers, visit frequency, budget analysis
4. **Expense Monitoring**: Team expense trends and patterns
5. **Company Insights**: Most visited clients, relationship depth
6. **AI Recommendations**: Team-level strategic suggestions

---

7. Non-Functional & Security

- **Performance**:
  - Dashboard loads in under 2 seconds
  - Visit form submission under 3 seconds
  - AI insights generation within 5-10 seconds
  - Works seamlessly on mobile devices
- **Security & Privacy**:
  - Role-based access control
  - Data encrypted in transit and at rest (Firebase)
  - No sensitive data stored unencrypted
  - Individual user data isolation
  - GDPR-compliant data handling
- **Availability & Reliability**:
  - Progressive Web App for offline capability
  - Automatic data sync when online
  - Regular automatic backups

8. Roles & RACI

Role	Responsibility	R	A	C	I
Sales Team Members	Log visits, track action items, review AI insights	R			
Managers	Team oversight, coaching, performance review	R	A	C	
Harpinder Singh	Development, maintenance, support, deployment	R			C
Sales Operations	Process adherence, data quality			R	

R: Responsible, A: Accountable, C: Consulted, I: Informed

---

9. Deployment & Access

Platform: https://salessynapse.vercel.app
Environments:

- Production: Live environment for all users
- Development: Testing/staging (separate URL)

Installation (PWA):

- **iOS Safari**: Share → Add to Home Screen
- **Android Chrome**: Menu → Add to Home Screen

Access Credentials:

- Individual credentials provided via email
- First login requires password reset
- Role-based permissions automatically assigned

---

10. Risks & Mitigation

Risk	Impact	Mitigation
AI Service Downtime	Insights unavailable	Fallback to basic templates, manual entry option
User adoption resistance	Low usage	Training sessions, phased rollout, champion users
Data entry quality	Inaccurate analytics	Form validation, mandatory fields, regular audits
Export format changes	Reporting issues	Standard Excel template, backward compatibility

---

11. Acceptance Criteria

- App accepts visit data through structured forms with validation
- AI generates relevant insights within 10 seconds of submission
- Dashboard displays real-time statistics and metrics
- Excel export includes all visit data in organized format
- Offline mode allows data entry without internet
- Manager view shows team performance metrics
- Role-based access controls work correctly

---

12. Change Control & Support

- **Contact**: Harpinder Singh (RV Solutions) – *Harpinder.singh@rvsolutions.in*
